### The H-Track Series

This entry level flatbed printer offers a mid-level output and has been recognized as an industry favorite. With our user-friendly controls and quick-change tooling makes this series of machine a great addition to your production line.

### The Model C Series

Two-piece hard gelatin capsule printing with drum feeding and rectification, allows printing to be placed on the cap, body or both areas of a two piece hard gelatin capsule. This high output machine sets the bar when it comes to two piece hard capsule printing, offering servo motor controls and operator recipe selection.

### Lab Scale Equipment

The development of lab scale equipment is important to the pioneers in the industry. whether you're a small start-up company doing research and development on the newest treatments, or a large-scale facility looking to get back into development.
